

Well Nice Club
Technical Specification
Last updated: 22nd June 2026

Build a premium paid members club called **Well Nice Club** that lives at:

club.wellnice.com

The platform should combine:

- Paid memberships
- Community
- Editorial content
- Events
- Recommendations
- AI-powered Concierge
- Member benefits
- Admin management via Payload CMS

The experience should feel like a private members club and lifestyle publication rather than a community platform.

Technology Stack

Frontend:

- Next.js 15
- TypeScript
- Tailwind CSS
- shadcn/ui
- Lucide Icons

CMS:

- Payload CMS

Database:

- Supabase PostgreSQL

Authentication:

- Clerk

Payments:

- Stripe Billing
- Stripe Checkout
- Stripe Customer Portal

Hosting:

- Vercel

Repository:

- GitHub

Domain:

- club.wellnice.com

Visual Design Requirements

Use Well Nice branding throughout.

Visual references:

- Well Nice
- OPUMO
- The Modern House

UX reference:

- Mighty Networks

Use Mighty Networks for:

- Navigation structure
- Spaces
- Feed
- Events
- Profiles

Do not copy Mighty visually.

Colour palette:

- Black
- White
- Grey

Avoid:

- Bright colours
- SaaS dashboards
- Discord styling
- Facebook styling
- Heavy gradients

The experience should feel:

- Editorial
- Premium

- Calm
- Human
- Curated
- Exclusive

Membership Plans

Founding Member:

- £60/year

Monthly:

- £8/month

Annual:

- £80/year

Waitlist System

Route:

/waitlist

Users can submit:

- Name
- Email
- Location
- Instagram (optional)
- Interests
- Why do you want to join?

Payload CMS status:

- new
- approved
- invited
- joined
- rejected

Admins can approve and invite users.

Authentication

Use Clerk.

Requirements:

- Email signup

- Email login
- Password reset
- Protected routes
- Session management

User records must sync into Payload CMS.

Stripe Subscription Flow

Route:

/join

Flow:

1. User creates account
2. User selects membership plan
3. User completes Stripe Checkout
4. Stripe webhook activates membership
5. User enters onboarding
6. User gains access to member area

Access must be controlled by Stripe webhook confirmation.

Do not grant access based on checkout success page.

Stripe Webhooks

Implement:

- checkout.session.completed
- customer.subscription.created
- customer.subscription.updated
- customer.subscription.deleted
- invoice.payment_succeeded
- invoice.payment_failed

Membership statuses:

- pending
- active
- past_due
- cancelled
- expired
- banned

Onboarding

Route:

/onboarding

Step 1:

Profile

- Name
- Photo
- Bio
- Location

Step 2:

Interests

- Food
- Home
- Style
- Travel
- Family
- Culture
- Music
- Objects
- Creativity

Step 3:

Introduction

Optional first post

Step 4:

Complete onboarding

Redirect:

/app

Member Application

Route:

/app

Requirements:

- Authenticated user
- Active membership
- Onboarding completed
- Not banned

Navigation

Desktop Navigation

- Home
- Journal
- Spaces

- Recommendations
- Concierge
- Events
- Members
- Drops
- Account

Mobile Navigation

- Home
- Spaces
- Events
- Concierge
- Account

Home Feed

Route:

/app

Display:

- Featured article
- Recommendations
- Community posts
- Upcoming events
- Concierge prompt
- Member benefits

Members can:

- Like
- Comment
- Save
- Report

Spaces

Route:

/app/spaces

Initial spaces:

- Start Here
- Recommendations
- Food & Drink
- Home
- Style
- Travel
- Family

- Creativity
- Events
- Drops

Each space contains:

- Cover image
- Description
- Posts
- Members
- Events
- Pinned content

Members can post inside spaces.

Posts

Members can:

- Create post
- Edit own post
- Upload images
- Comment
- Like
- Save
- Report

Admins can:

- Pin post
- Feature post
- Hide post
- Delete post
- Lock comments

Comments

Nested comments.

Basic moderation.

Journal

Route:

/app/journal

Content types:

- Articles
- Interviews

- Guides
- Playlists
- City Guides
- Member Stories

Managed entirely through Payload CMS.

Events

Route:

/app/events

Members can:

- View events
- RSVP
- See attendees

Event types:

- Meetups
- Walks
- Talks
- Studio Visits
- Online Sessions
- Product Launches

Members Directory

Route:

/app/members

Fields:

- Name
- Photo
- Bio
- Location
- Interests
- Instagram
- Website

Searchable.

Member visibility is opt-in.

Recommendations

Route:

/app/recommendations

Categories:

- Coffee
- Restaurants
- Hotels
- Books
- Music
- Objects
- Home
- Kids
- Culture
- Independent Brands

Members can:

- Submit recommendations
- Comment
- Save

Recommendations require admin approval.

Concierge

Route:

/app/concierge

The Concierge is a core feature.

It is not customer support.

It is an AI-powered Well Nice tastemaker.

Its purpose is to help members discover:

- Places
- Products
- Experiences
- Travel
- Food
- Design
- Independent brands
- Books
- Music
- Gifts
- Family activities
- Creative inspiration

The Concierge should behave like a trusted friend with exceptional taste.

Concierge V1

Human-assisted AI.

Flow:

1. Member submits request
2. AI generates draft response
3. Admin reviews response
4. Member receives final response
5. Response can be published to recommendation library

Concierge V2

Fully AI-powered.

Flow:

1. Member submits request
2. AI generates answer instantly
3. Response delivered to member
4. Popular responses become recommendations

AI Requirements

Use OpenAI API.

The AI must:

- Sound human
- Sound like Well Nice
- Be selective
- Be curated
- Avoid generic lists
- Explain why recommendations are interesting

The AI should prioritize:

- Independent brands
- Beautiful spaces
- Creative experiences
- Thoughtful products
- Local recommendations

Recommendation Knowledge Base

The Concierge should learn from:

- Journal content
- Recommendations
- Concierge responses
- Community submissions

- Partner content

The goal is to build a proprietary Well Nice recommendation engine.

Drops

Route:

/app/drops

Contains:

- Early access products
- Discount codes
- Partner offers
- Hidden Shopify products
- Limited releases

Account

Route:

/app/account

Members can:

- Edit profile
- Update interests
- Manage visibility
- View membership status
- Access billing portal

Payload CMS

Payload CMS acts as the complete operational back office.

Build Phases

Phase 1

- Waitlist
- Auth
- Stripe
- Webhooks
- Onboarding
- Protected App
- Payload CMS

Goal:

User can join, pay and access the club.

Phase 2

- Feed
- Spaces
- Posts
- Comments
- Profiles
- Recommendations
- Concierge

Goal:

Basic Mighty Networks experience plus Well Nice Concierge.

Phase 3

- Journal
- Events
- Drops
- Directory
- Notifications
- Search
- Saved content

Goal:

Full Well Nice Club experience.

Final Instruction

Build a premium digital members club with:

- The UX clarity of Mighty Networks
- The editorial quality of The Modern House
- The curated commerce of OPUMO
- The personality of Well Nice

Focus first on a reliable paid members
